Reference: Desco 19431 Body Voltage Meter – Statement of Volatility

This product contains the following memory devices:

Flash EEPROM – Non-Volatile – System Information

The Body Voltage Meter incorporates non-volatile memory for storage of test results. Non-volatile memory is memory whose contents are retained when power is removed. This memory can be sanitized to remove previously stored measurements. The sanitation process for this memory follows.

1. Toggle to the CLEAR operation mode.
2. Press the Start/Stop button.
3. Follow the on-screen prompts to either delete the last stored graph or all stored graphs.

The product information is to the best of our knowledge and may be based on third party supplier information and/or our knowledge and experience regarding components found in products used in ESD control.

See Desco Industries Inc limited warranty at DescoIndustries.com/Warranty.aspx which states in part: Desco Industries Inc only obligation shall be to replace such quantity of the product proved to be defective. Desco Industries Inc shall not be liable for any injury, loss, or damage, direct or consequential, arising out of the use of or the inability to use the product. Before using, users shall determine the suitability of the product for their intended use, and users assume all risk and liability whatsoever in connection therewith.

A handwritten signature in black ink, appearing to read "Victor A. Arellano".
